from the moment gunter padded into her life at just ten weeks old everything changed in this heartfelt and often humorous story dale marie taylor shares tale of raising and training a german shepherd puppy into a devoted service dog and trusted lifeline what begins as a simple admiration for the breed grows into an extraordinary journey of dedication learning laughter and

deep companionship more than a training manual and far more than a pet story this book offers an intimate look at what it truly means to live and move through the world with a service dog dale invites readers into the daily realities of training bonding and navigating public life revealing both the joys and the challenges behind the scenes through perseverance and countless hours of work gunter earns his akc star puppy canine good citizen and urban canine good citizen certifications but his greatest accomplishments are the quiet life changing moments steadying dale when her balance falters helping her rise after a fall and standing watch with unwavering devotion with warmth honesty and gentle humor this book dispels common myths about service dogs and thoughtfully explains why a true service animal is not created by a vest alone but by patience consistency and a deep bond built on trust this is the story of a remarkable dog and the woman whose life he changed forever

this is the perfect complement to chemical bonding across the periodic table by the same editors who are two of the top scientists working on this topic each with extensive experience and important connections within the community the resulting book is a unique overview of the different approaches used for describing a chemical bond including molecular orbital based valence bond based elf aim and density functional based methods it takes into account the many developments that have taken place in the field over the past few decades due to the rapid advances in quantum chemical models and faster computers

the series structure and bonding publishes critical reviews on topics of research concerned with chemical structure and bonding the scope of the series spans the entire periodic table and addresses structure and bonding issues associated with all of the elements it also focuses attention on new and developing areas of modern structural and theoretical chemistry such as nanostructures molecular electronics designed molecular solids surfaces metal clusters and supramolecular structures physical and spectroscopic techniques used to determine examine and model structures fall within the purview of structure and bonding to the extent that the focus is on the scientific results obtained and not on specialist information concerning the techniques themselves issues associated with the development of bonding models and generalizations that illuminate the reactivity pathways and rates of chemical processes are also relevant the individual volumes in the series are thematic the goal of each volume is to give the reader whether at a university or in industry a comprehensive overview of an area where new insights are emerging that are of interest to a larger scientific audience thus each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole the most significant developments of the last 5 to 10 years should be presented using selected examples to illustrate the principles discussed a description of the physical

basis of the experimental techniques that have been used to provide the primary data may also be appropriate if it has not been covered in detail elsewhere the coverage need not be exhaustive in data but should rather be conceptual concentrating on the new principles being developed that will allow the reader who is not a specialist in the area covered to understand the data presented discussion of possible future research directions in the area is welcomed review articles for the individual volumes are invited by the volume editors
